# LED Wrist Watch User Manual

For example, timing display by today: 11:20AM on 25th Dec. operation as below:

Press key 2time to display DATE item, keep in mind to remember what date exactly to show. (Pls refer to below fig: 24th Dec.)

Again press the key to display timing. Once keep pressing the key for 2seconds, the HOUR signal keep twinkling (e.g.: 1time pressing add up 1hour). Then adjust the timing to 11am by pressed 2seconds, there the MINUTE signal automatically follows the same action like HOUR performance (e.g.:1time pressing add up 1minite). Finally goes to 59minutes. Wait for 1minute then press 2times to display date item, it presents like below:

Timing :12:00

Date: 24th Dec.

If need to display 12AM on 24th Dec., by added press 12times to adjust the t iming to 11:20am to achieve. (Follow to adjust the date to day 25th.)

Date: 25th Dec.

If need to display 12PM on 25th Dec., to repeat above action is done. E.g.: by added timing goes to 11:20am to achieve.
