

Changeable atomizer system

eGo-c<sup>TM</sup>

User Manual

This kit contains

- 2 x atomizer cone
- 5 x atomizer Head
- 2 x atomizer cone base
- 2 x 650 or 900 or 1100mah batteries
- 1 x USB wall charger
- 1 x USB charger
- 5 x Tank Cartridge
- 1 x manual

※ We reserve the right to change components and functions of the e-cigarette, in order to improve the e-cigarette product, without any notice to consumer.

## Experience the Tank system

The eGo-C builds on the achievements of the eGo. Its huge 650/900/1100mAh battery enables over 800 puffs a day. The eGo-C is the first e-cigarette to apply the new tank system for dripping e-liquid directly into its 1.2ml tank cartridge without the use of tissue inside the tank. This revolutionary new e-cigarette makes dripping easier and less frustrating for consumers.

The eGo-C consists of tank cartridge, tank atomizers and batteries. It offers five times as many puffs as other normal e-cigarette. The eGo-C gives a realistic feel and provides lots of vapor with mechanisms inherited from the eGo double air circulation system. The new power saving battery function improves the efficiency of power consumption.

## Charging

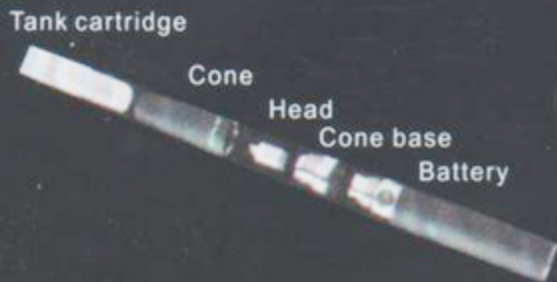

The eGo-C uses a 3.7volt 650/900/1100mAh rechargeable battery with a power saving power saving / safety function which allows you to turn on and off the battery. This prevents accidental discharge of battery when not in use. To avoid damage to your eGo-C, under normal conditions, it takes about 5 hours to charge battery. The eGo-C battery has a microchip to prevent overcharging. The charger will automatically stop when battery is fully charged.

To Charge battery, gently screw battery into the USB charger. Plug USB cable into a USB charger or a computer. Battery should flash to show it is charging. The light on the USB charger is red when charging. Green when fully charged. When using a computer to recharge.

- You should use only the dedicated USB charger provided to avoid damaging battery.
- Use the high voltage USB port to charge battery properly.
- charge the battery fully before using to maintain a good battery life.

## How to assemble your eGo-c

To assemble the eGo-C, you need the battery compartment, an atomizer and a Tank cartridge. First, screw battery compartment clockwise into the hole on the atomizer. Gently push the Tank cartridge into the atomizer. Forcing Cartridge into the atomizer may cause damage. Do Not Force Cartridge.

## Using the eGo-C

The eGo-C works only when you press the LED button. Press the LED button and inhale at the same time. Release the button after inhaling. When you press the button, the LED light will turn on. Pressing the button too long may cause overheating and damage the eGo-C.

### ■ Battery

Always charge the battery fully before using to maintain a good battery life. To ensure a good battery life; Do not store battery in a hot or humid environment. Do not drop battery. Do not force battery. Keep battery away from sharp objects.

### ■ Liquid

To prevent excess liquids from building up in the mouth piece, clean the overflow prevention cap and the vapor pathway frequently to prevent blockage. Clean excess liquids from around the refill hole before using. If you get excess liquids on your lips, wipe area immediately or wash with water. Do not drink liquids. Use only as instructed. Keep liquids in a safe place away from children or pets. Do not store in a hot place or in direct sunshine. Do not store in a cold place to prevent freezing. Improper storage will cause e-liquid to spoil or lose flavor

#### ■ Atomizer

If the atomizer overheats, wait until it returns to a normal temperature before using. If the heating element in the atomizer is dry, it will produce a burning taste. Please ensure there is enough liquid in the tank to prevent heating element from drying.

#### Guarantee

Products are guaranteed for sixty days from the delivery date. We will not guarantee products that have been damaged through improper use or intentionally damaged.

The battery is shipped in the off position. In off position, the eGo-C will not function even when pressing the atomizer button. To turn on battery, press atomizer button 5 times within 2 seconds. You will see LED button flash. To turn off battery, press atomizer button 5 times in 2 seconds.

#### Refilling liquid

In previous versions of e-cigarette, a tissue was used to drip liquid into the cartridge. The eGo-C does not need a tissue. Just open the cap, drip liquid into the cartridge and close the cap. The eGo-C makes refilling easier.

Open the top of the tank cartridge as shown in the picture. Drip liquid into the cartridge until it is full. Close cartridge. Follow directions for assembling the eGo-C.

#### Maintaining Product

Maintaining the eGo-C functioning well, you should use as directed and clean regularly. Be careful not to let dust into atomizer and battery component.
